STANDING-SEAM FABRIC CANOPY · PATENT PENDING

Metal Look

The standing-seam profile architects specify, built as tensioned fabric.

MANUFACTURED IN MILLDALE, CONNECTICUT

STANDING-SEAM FABRIC CANOPY

SOLARSHIELD · WHOLESALE TO AUTHORIZED DEALERS

THE CASE

Why it sells.

Metal Look is a fixed canopy with a true raised standing-seam rib profile, built as a tensioned fabric system on a repeatable frame. It exists for one situation: an architect has specified standing-seam metal and you want to bid the job with a fabric system your own crew can fabricate and install.

Easy to install

A tensioned fabric skin over a frame means lighter components, simpler attachment and lighter footings than a metal panel assembly — no crane day, no panel damage claims. The layout is standardized, so the second install goes faster than the first and your crew already knows the system.

Easy to offer

It answers a bid you would otherwise sit out. When the drawing says standing seam, you can quote the architectural read without subbing the work to a metal shop or walking away from the job.

Curves without a change order

Radii and curved runs come naturally to a tensioned fabric skin. In metal panel each curve means custom brake work, so the geometry that costs most in metal is ordinary here.

Photographed on dealer installations. SolarShield manufactures the system; the dealer measures, quotes, and installs it.

SPECIFICATION

In detail.

01

True standing-seam profile

Raised standing-seam ribs are built directly into the fabric panel, on a curved or straight run — the architectural read of metal panel, engineered in tensioned fabric.

02

Patent pending

The Metal Look standing-seam fabric system is patent pending.

03

Built flat, then tensioned

Every panel starts flat on the cutting table in Milldale, Connecticut. The ribs are formed into the panel, then the finished skin is tensioned over the frame — a repeatable layout, panel after panel.

04

Custom sizing

Available in custom sizes based on project requirements. Dealers should confirm dimensions, structure, mounting and drainage against the opening.

05

Colorways

Acrylic and vinyl colorways, so the canopy can match a building, a brand, or a rendering — a range metal coil stock does not carry.

06

Curved and straight runs

Curves and radii are formed in the tensioned skin rather than brake-formed, so curved geometry does not require custom panel fabrication.

07

Handling and freight

A fabric skin and frame ship and handle as fabric rather than as metal panel — relevant to both your freight and your install day.

08

Where it fits your board

Metal Look is for jobs specified in standing-seam metal. Frontier remains the fixed aluminium canopy line, and the retractable lines cover on-demand shade — these answer different drawings, not the same one twice.

AT A GLANCE			
OPERATION	**Fixed (non-retractable)**	SEGMENT	**Commercial + residential**
MAX WIDTH	**Custom size**	MAX PROJECTION	**Custom size**
MOUNTING	**Custom mounting options**	MOTORIZATION	Not applicable
LED	Not published	STATUS	**Available**

WHERE IT FITS YOUR BOARD

Best for.

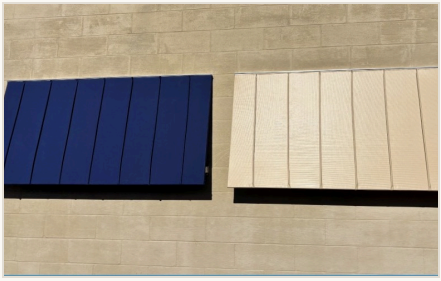
- Bids specified in standing-seam metal
- Curved and radius runs
- Storefronts and entrances
- Dealers without a metal fabrication shop

FABRIC

Acrylic and vinyl colorways. Confirm the current range against your fabric books.

PRICING, TERMS AND WARRANTY

Wholesale pricing, minimum orders, lead times and the complete warranty terms are set out as part of the dealer package rather than published. They are covered directly on the first call — ask and you get the answer, not a sales sequence.



DEALER PROGRAM

Carry the line.

SolarShield manufactures in Milldale, Connecticut and sells wholesale through authorized dealers. We take orders from dealers rather than from homeowners — there is no consumer price list, and homeowner enquiries that reach us are referred out to a dealer. Wholesale pricing, lead times, territory and the full warranty terms are covered on the first call rather than after a sales sequence.
